

TASK 7:

Identify and Remove Suspicious Browser Extensions

JUN 5, 2025

ADHIKRISHNAN M

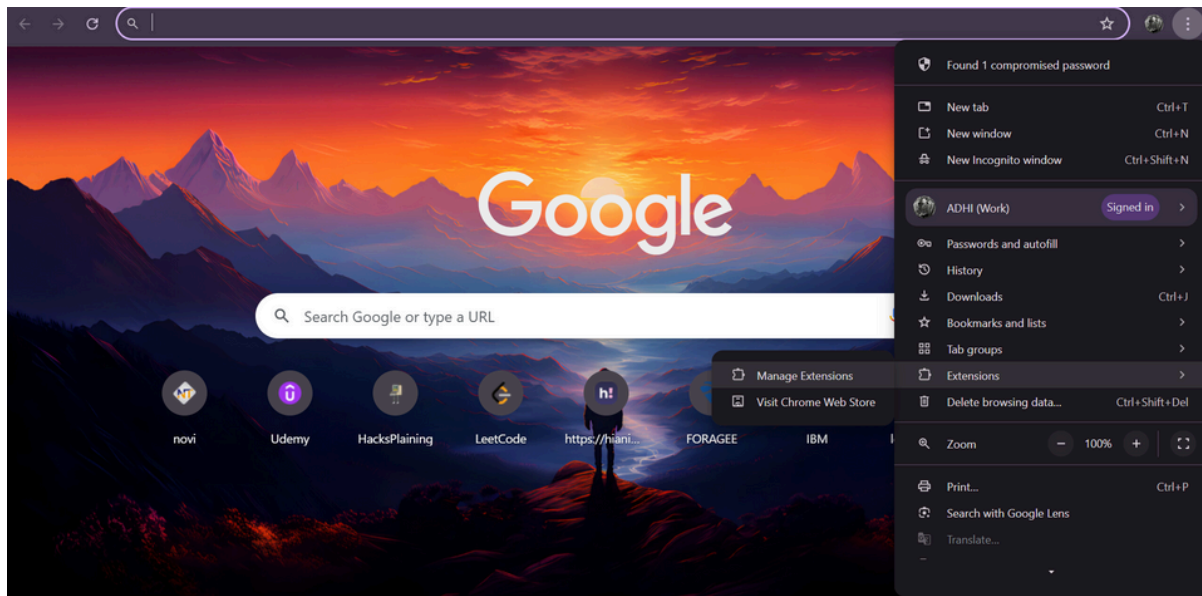

adhikrishnan9943@gmail.com

Step 1:

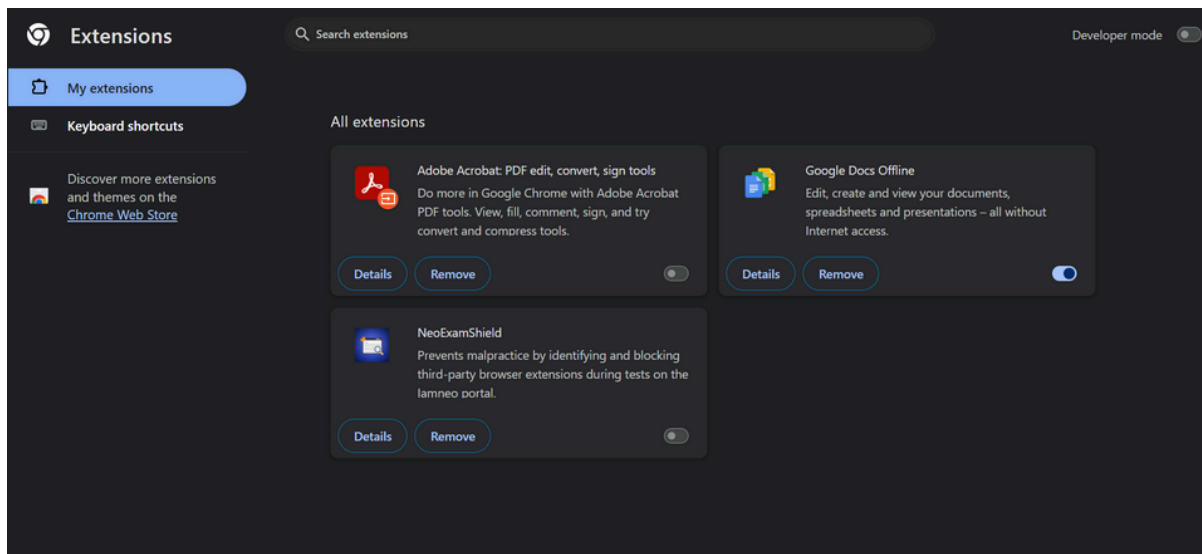

Objective: Learn to spot and remove potentially harmful browser extensions.

Tools: Any web browser (Chrome, Firefox)

Deliverables: List of suspicious extensions found and removed (if any)

Step 2:

STEP 3

List of Extensions Reviewed:

1. AdBlock — Safe
2. Grammarly — Safe
3. Googlefiles-- Safe
4. NeoExamSheild-- Safe

STEP 4

Learnings:

- High permissions from unknown extensions are risky.
- Always verify the source and reviews before installing.
- Regularly review installed extensions to ensure browser security.

Research How Malicious Extensions Harm Users

Malicious extensions can:

- Steal personal data and passwords.
- Inject unwanted ads or redirect you to phishing sites.
- Monitor your browsing activity.
- Install malware or spyware.
