# TASK 4:

Setup and Use a Firewall on Windows/Linux

MAY 30, 2025

ADHIKRISHNAN M

adhikrishnan9943@gmail.com

Open Windows Firewall GUI:

- Press Windows Key, type "Windows Defender Firewall", and open it.

Step 2:

STEP 3
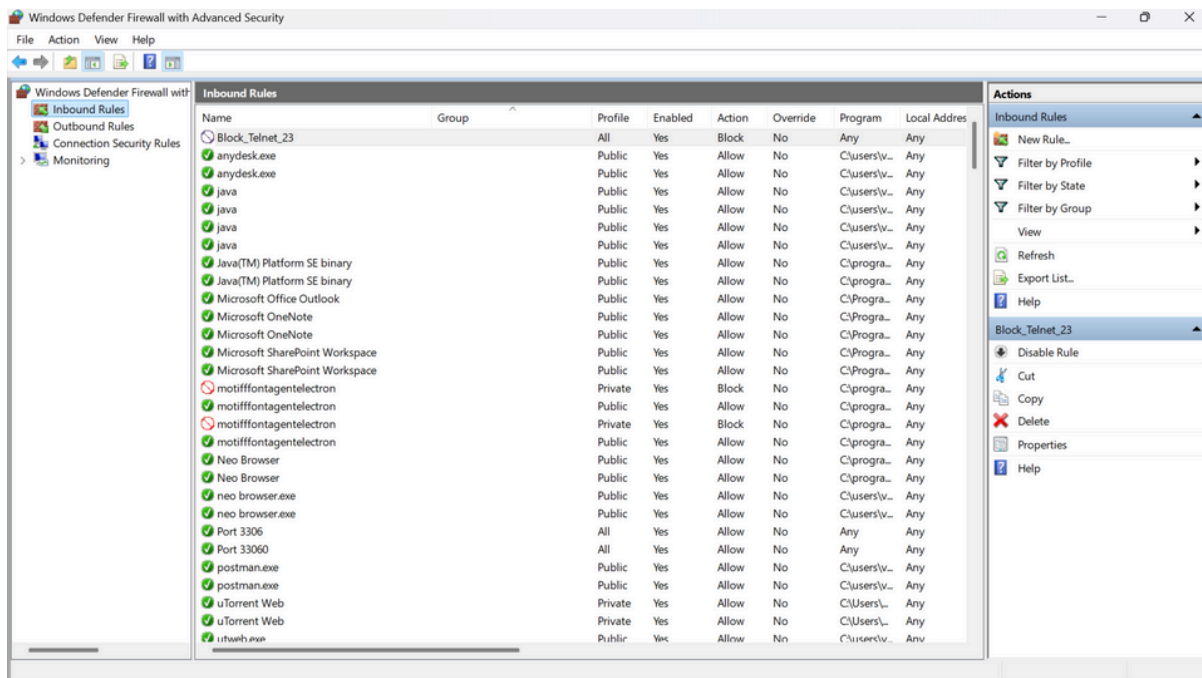

STEP 4
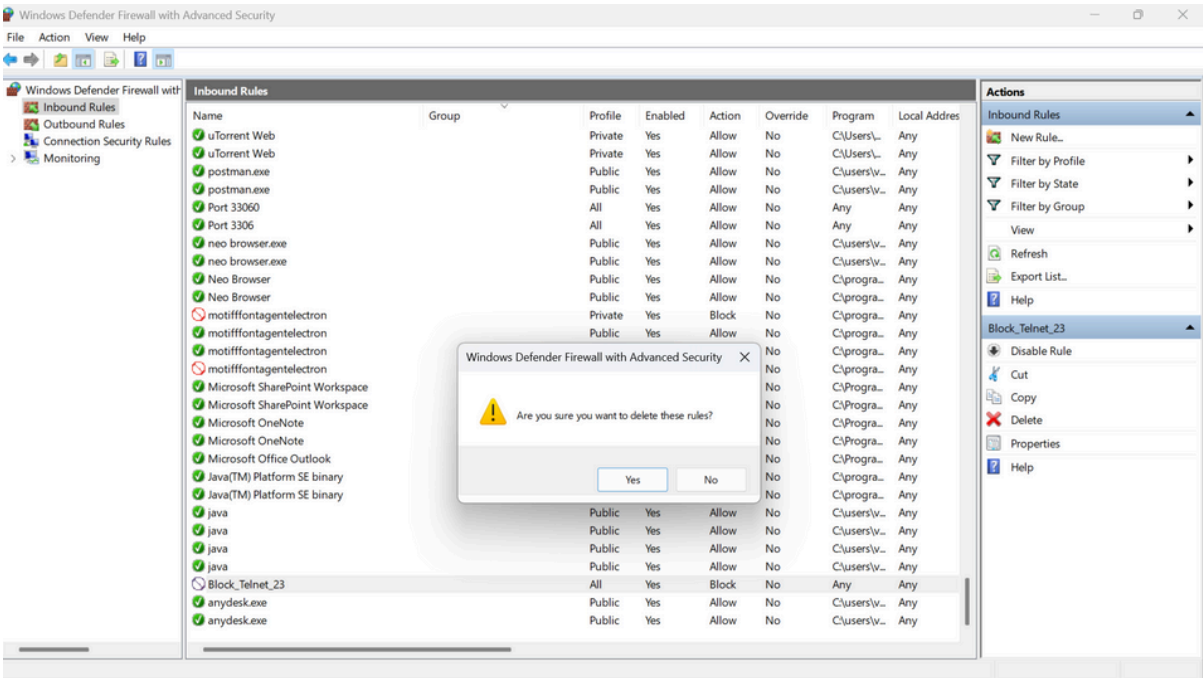

✅ 4. Test the Rule:
Try using telnet (needs to be enabled via Windows Features) and connect to localhost 23. Should be blocked.
Take a screenshot of the failed connection.

✅ 5. Allow SSH (Port 22):
Repeat steps above but choose:
TCP port 22
Allow the connection

✅ 6. Remove Block Rule:
Go back to Inbound Rules
Find Block_Telnet_23
Right-click → Delete
Take a screenshot.
